

TDM Studio: Visualizations Quick Start

TDM Studio places the power of text and data mining directly in the hands of researchers. This solution from ProQuest gives students, faculty and researchers access to rights-cleared content and text and data mining tools to help make new connections and uncover trends and insights.

This guide provides an overview of the steps needed to get started in Visualizations. These interactive data visualization tools can be used for exploratory research, introducing broad text mining skills across campus and the classroom. For more details see the **TDM Studio LibGuide**.

Step	Instructions	Visual Guide
Create account / Login	<ol style="list-style-type: none"> Go to https://tdmstudio.proquest.com Click "Create Account" button Use your institution/university email address to create your account 	
Create a new project	<ol style="list-style-type: none"> From the TDM Studio home page, select the "Create New Project" button. Select one or more types of Visualizations you would like to include in your project: <ul style="list-style-type: none"> Geographic Analysis Sentiment Analysis Topic Modeling 	
Define dataset	<ol style="list-style-type: none"> Search for your topic using keywords and boolean search commands. Apply filters such as Data Range, Source and Document Type, or de-select Publications from the results. Dataset must be ≤ 10,000 documents in order to generate. 	
Review project	<p>Select Review Project once there are ≤ 10,000 documents.</p> <ul style="list-style-type: none"> Results will process in the Visualization Dashboard. Data processing time may vary based on analysis type and number of documents. 	
Analyze your data	<p>Create up to 10 projects in the Visualization Dashboard.</p> <ul style="list-style-type: none"> Select a Visualization type from the options identified during dataset creation. Begin interacting within the Visualization using the tools provided.
